## **E. NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

### **N1. Corporate information**

LY Corporation Limited (the “**Company**”) is a limited liability company incorporated and domiciled in Singapore and is listed on the Catalist Board of SGX-ST. The immediate and ultimate holding company is Lian Yu Holdings Pte. Ltd., which was incorporated in Singapore.

These condensed interim consolidated financial statements as at and for the six months ended 30 June 2021 comprise the Company and its subsidiaries (collectively, the “**Group**”). The principal activity of the Company is that of investment holding.

The principal activities of the Group are:

- (a) Manufacturing of all kinds of furniture;
- (b) Manufacturing of any type of woodwork or building product;
- (c) Trading of all kinds of materials, furniture and general hardware; and
- (d) Investment holding company.

### **N2. Basis of Preparation**

The condensed interim financial statements for the six months period ended 30 June 2021 have been prepared in accordance with Singapore Financial Reporting Standards (International) (“**SFRS(I)**”) 1-34 *Interim Financial Reporting* issued by the Accounting Standards Council Singapore. The condensed interim financial statements do not include all the information required for a complete set of financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group’s financial position and performance of the Group since the last annual financial statements for the year ended 31 December 2020.

The accounting policies adopted are consistent with those of the previous financial year which were prepared in accordance with SFRS(I)s, except for the adoption of new and amended standards as set out in N2.1.

The condensed interim financial statements are presented in Ringgit Malaysia (“**RM**”) which is the Company’s functional currency and all values in the tables are rounded to the nearest thousand (RM’000), except when otherwise indicated.

#### **N2.1 New and amended standards adopted by the Group**

A number of amendments to SFRS(I)s have become applicable for the current reporting period. The Group did not have to change its accounting policies or make retrospective adjustments as a result of adopting those standards.

#### **N2.2. Use of judgements and estimates**

In preparing the condensed interim financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgements made by management in applying the Group’s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended 31 December 2020.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

## E. NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

### N2.2. Use of judgements and estimates (cont'd)

Information about critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is included in the following notes:

- Determination of functional currency

The Group measures foreign currency transactions in the respective functional currencies of the Company and its subsidiaries. In determining the functional currencies of the entities in the Group, judgement is required to determine the currency that mainly influences sales prices for goods and services and of the country whose competitive forces and regulations mainly determines the sales prices of its goods and services. The functional currencies of the entities in the Group are determined based on management's assessment of the economic environment in which the entities operate and the entities' process of determining sales prices. Management concluded that the functional currency of the Company and its subsidiaries to be RM.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next interim period are included in the following notes:

- Valuation of inventories

The raw materials are measured based on first-in-first out basis, while work in progress inventories and finished goods are measured using the standard costing technique. Standard costing was computed based on management's best estimates of the overhead cost incurred in the production. Standard costing is subject to periodic review.

In accordance with SFRS(I) 1-2, "The cost of inventories shall comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition". As such, management's estimates is involved in ensuring that the standard costing closely approximate the actual cost incurred. The carrying amount of inventories as at 30 June 2021 was approximately RM114,335,000 (31 December 2020: RM96,503,000).

- Impairment of intangible assets (including goodwill), property, plant and equipment, right-of-use assets and the Company's investment in subsidiaries

The Group determines whether intangible assets (including goodwill), property, plant and equipment, right-of-use assets and the Company's investment in subsidiaries are impaired on an annual basis. This requires an estimation of the value in use of the cash-generating unit (or group of cash-generating units) to which goodwill is allocated. Estimating the value-in-use method requires the Group to make an estimate of the expected future cash flows from the cash-generating unit (or group of cash-generating units) and also to choose a suitable discount rate in order to calculate the present value of those cash flows.

The carrying amounts of the Group's intangible assets (including goodwill), property, plant and equipment and right-of-use assets as at 30 June 2021 were approximately RM2,948,000, RM157,523,000 and RM25,872,000 respectively (31 December 2020: RM2,974,000, RM154,283,000 and RM21,576,000 respectively). The carrying amount of the Company's investment in subsidiaries as at 30 June 2021 were approximately RM62,156,000 (31 December 2020: RM59,946,000).

## E. NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

### N2.2. Use of judgements and estimates (cont'd)

- Income taxes

Significant judgement is involved in determining the Group's provision for income taxes. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for expected tax issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recognised, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made. The amounts of income tax expenses are disclosed in N7.

### N3. Seasonal operations

Generally, the Group's businesses are not subject to any significant seasonal fluctuations that will affect the business and operations. However, the revenue is generally higher in the second half of the year due to festive seasons in the US.

### N4. Segment and revenue information

The Group is organised into the following main business segments:

- (a) Segment 1: Manufacturing of all kinds of furniture ("**Furniture**")
- (b) Segment 2: Manufacturing of any type of woodwork or building product ("**Millwork**")

These operating segments are reported in a manner consistent with internal reporting provided to the Chief Executive Officer who are responsible for allocating resources and assessing performance of the operating segments.

**N10. Financial assets at fair value through profit or loss**

**N10.1 Fair value measurement**

The Group categorises fair value measurements using a fair value hierarchy that is dependent on the valuation inputs used as follows:

Level 1 – Quoted prices (unadjusted) in active market for identical assets or liabilities that the Group can access at the measurement date;

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and

Level 3 – Unobservable inputs for the asset or the liability.

Fair value measurements that use inputs of different hierarchy levels are categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

**N10.2 Assets that are measured at fair value**

The following table shows an analysis of each class of assets measured at fair value by level of fair value hierarchy at the end of the reporting period:

	<b>Significant other observable inputs (Level 2)</b>	
	<b>30 June 2021</b>	<b>31 December 2020</b>
	RM'000	RM'000
<b>Assets measured at fair value</b>		
Non-equity investment security at FVPL	–	1,005

During the interim period, the Group had disposed the investment security for cash and realised the capital appreciation. The investment security had a fair value of RM1,009,000 at the date of disposal.

Methods and assumptions used to determine fair value

The methods and assumptions used by management to determine fair value of assets and liabilities other than those whose carrying amounts reasonably approximate their fair values as follows:

<b>Asset</b>	<b>Methods and assumptions</b>
• Non-equity investment security	The fair value is determined by reference to valuation provided by financial institutions.

**E. NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)**

**N15. Subsequent events**

The emergence of COVID-19 has brought about uncertainties to the general economic environment since early 2020 and the new variants of the COVID-19 may affect the Group's operations and its performance subsequent to 30 June 2021. The Group is cognisant of the challenges posed by these developing events and the potential impact they have on the business. The Group will continuously assess the situation, work closely with local authorities to support their efforts in containing the spread of COVID-19, and put in place measures to minimize impact to the business.

The Malaysian Government has announced on 27 June 2021 that the full movement control order (which is Phase 1 of Malaysia's National Recovery Plan for COVID-19) ("**FMCO**") effected from 1 June 2021 will be extended. As furniture manufacturing is not included in the list of essential economic sectors and services, the Group's production activities have been temporarily suspended since 1 June 2021 in compliance with the directives. The Group has however, been able to resume loading and unloading activities since 15 June 2021 on certain weekdays.

As announced by the Company on 30 August 2021, the Group has received the approvals from the relevant authorities and has resumed operations. As at the date of this announcement, LY Furniture Sdn Bhd, our wholly owned subsidiary, with 40% fully vaccinated staff is allowed to operate its factories at 60% capacity with effect from 27 August 2021 while Leyo Manufacturing Sdn Bhd, a 51%-owned subsidiary, with 60% fully vaccinated staff are allowed to operate its factories at 80% capacity with effect from 30 August 2021. Our factories will be able to resume full operations when our staff are 80% fully vaccinated.

## **CONDENSED INTERIM CONSOLIDATED STATEMENT OF PROFIT OR LOSS AND OTHER COMPREHENSIVE INCOME**

***Review of Group's performance for 6 months ended 30 June 2021 ("1H2021") as compared to the 6 months ended 30 June 2020 ("1H2020")***

### Revenue

The Group's revenue decreased by approximately RM11.6 million, or 10.8%. This was mainly attributable to a decrease in the number of containers loaded with products ("**40- ft container**") sold from 1,947 40-ft containers in 1H2020 to 1,725 40-ft containers in 1H2021 as a result of the following:

- (a) On 7 January 2021, Kementerian Kesihatan Malaysia (i.e., the Ministry of Health of Malaysia) ("**KKM**") had issued notices ordering to close 11 of the Group's factories/warehouses until 16 January 2021. In addition, KKM has also verbally sought the closure of 2 additional factories/warehouses. The Group complied with the requirements of KKM by closing 13 of its factories/warehouses (including those requested by KKM verbally). The closure was a result of the Group's foreign workers having to be quarantined and isolated when some of the employees were infected with COVID-19;
- (b) FMCO implemented by the Government of Malaysia in response to the COVID-19 pandemic which led to the temporary closure of the Group's operations for the period between 1 June 2021 and 26 August 2021; and
- (c) Shortages of containers that have impeded the delivery of finished goods to the Group's customers.

However, this was partially offset by an increase in the average selling price per 40- ft container from approximately RM55,000 in 1H2020 to approximately RM56,000 in 1H2021 as a result of the different product mix sold by the Group.

### Cost of sales and gross profits

The cost of sales decreased by approximately RM7.4 million, or 7.6%, mainly due to the decrease in labour costs as a result of reduced overtime and subcontractors' costs in tandem with the slow down in operational activities due to the temporary closure of our factories/warehouses in January 2021 and the temporary closure of the Group's operations for the period between 1 June 2021 and 26 August 2021.

As a result of the lower percentage decrease in cost of sales as compared to our revenue, our gross profit decreased by approximately RM4.2 million, or 43.2%. The overall gross profit margin also decreased from 9.0% in 1H2020 to 5.8% in 1H2021.

### Interest income

Interest income decreased by approximately RM0.1 million, or 79.9%, mainly due to lower cash placements in short term fixed deposits in the bank account maintained in Malaysia and coupled with the reduced overnight interest rate offered.

### Distributions from short-term investment security

Distributions from short-term investment security of approximately RM1,000 were income received for funds placed with a Money Market Fund during 2H2020. The Group had disposed the investment during 1H2021.

### Other income

Other income comprised mainly government grants, sale of timber, boards, hardware and scrap as well as charges for services provided such as transportation and rental received.

Other income increased by approximately RM0.2 million, or 8.7%, mainly due to receipt of government grants from the Government of Malaysia during COVID-19 to promote the creation of quality jobs, reduce unemployment and financial assistance paid to employers for each employee.

#### Selling and administrative expenses

Selling and administrative expenses increased slightly by approximately RM0.3 million, or 3.1%, as the Group's staff cost, directors' remuneration, professional fees and insurance costs were lower in 1H2020 due to more cost cutting measure effected in 1H2020.

#### Depreciation expenses

Depreciation expenses increased by approximately RM0.7 million, or 18.8% mainly due to the purchase of machineries and leasehold land and building in 1H2021.

#### Finance costs

Finance costs increased by approximately RM0.4 million or 168.9%, mainly due to the interest charged on the new term loans that were drawdown towards the end of the financial year ended 31 December 2020 and in 1H2021.

#### Other expense

Other expense increased by approximately RM2,000, or 100.0% mainly due to more fixed assets being written off in 1H2021 as compared in 1H2020.

#### Loss for the period

As a result of the lower revenue and higher costs and expenses, the Group reported a net loss of approximately RM2.4 million in 1H2021 as compared to a net profit of approximately RM1.3 million in 1H2020.

### **CONDENSED INTERIM STATEMENTS OF FINANCIAL POSITION**

#### ***Review of the Group's financial position as at 30 June 2021 as compared to 31 December 2020***

#### Non-current assets

Property, plant and equipment increased by approximately RM3.2 million, or 2.1% mainly due to the purchase of machineries and leasehold land and building during 1H2021.

Right-of-use assets increased by approximately RM4.3 million, or 19.9%, comprised the right to use the properties and land use rights by the Group over the respective lease period.

Intangible assets of approximately RM3.0 million consists of trademarks and goodwill arising from business combination as announced on 28 January 2019.

#### Current assets

Inventories increased by approximately RM17.8 million, or 18.5%, mainly due to the following:

- (a) Increase in finished goods due to shortages of containers which impeded the delivery of finished goods to the Group's customers. This included finished goods which required further improvements on customers' request and pending the customers' acceptance for which the Group has already received consideration from such customers totalling RM23.7 million as at 30 June 2021. The consideration is classified as contract liabilities under current liabilities. The container shortage situation has affected the Group's delivery of finished goods since the last quarter of FY2020. Please refer to paragraph 10 of this results

announcement for further elaborations on the impact of the container shortages to the Group; and

- (b) Increase in raw materials and work-in-progress as (i) the Group purchased more raw materials to meet the orders received in respect of the following quarters; (ii) the Group has also stocked up more raw materials in case of delay in receipt of raw materials due to container shortages; and (iii) a higher work-in-progress due to longer production lead time as shipments from suppliers were also affected by the container shortages.

Trade and other receivables of approximately RM11.0 million comprised trade receivables, receivables from related parties, deposit and other receivables. The decrease in trade and other receivables by approximately RM7.8 million, or 41.6%, was mainly due to the decrease of sales towards the end of 1H2021.

Contract assets of approximately RM1.0 million comprised the right to consideration for goods produced but not yet billed as at 30 June 2021 for sale of goods. The decrease in contract assets by approximately RM3.8 million, or 78.3%, was mainly due to the FMCO implemented by the Government of Malaysia in response to the COVID-19 pandemic which led to the temporary closure of the Group's operations for the period between 1 June 2021 and 26 August 2021.

Prepaid operating expense of approximately RM1.7 million comprised mainly expenses paid in advance as at 30 June 2021.

Tax recoverable, being prepaid current income tax of approximately RM3.9 million comprised tax paid in advance by the Malaysian subsidiaries for the Year of Assessment 2021.

#### Current liabilities and non-current liabilities

Loans and borrowings comprised financing arrangements, short-term trade financing, bankers' acceptance and long-term loans. The increase in loans and borrowings by approximately RM10.8 million, or 25.0% was mainly due to the increase in the usage of short-term financing and drawdown of new term loans of approximately RM11.4 million and approximately RM14.6 million respectively towards the end of 1H2021. However, the increase is offset by the decrease in the usage of bankers' acceptances by approximately RM14.9 million.

Trade and other payables of approximately RM29.5 million comprised trade payables, amount due to related parties and sundry payables. The decrease in trade payables and other payables of approximately RM9.8 million, or 25.0% was mainly due to the decrease in purchase of raw materials towards the end of 1H2021.

Contract liabilities of approximately RM23.8 million comprised the Group's obligation to transfer finished goods or services to customers for which the Group has received consideration from customers in advance as at 30 June 2021.

Lease liabilities of approximately RM7.4 million comprised the liabilities that the Group has to pay over the life of the leases for the use of the properties.

Accrued expenses of approximately RM0.4 million comprised accrued operating expenses.

#### **CONDENSED INTERIM CONSOLIDATED STATEMENT OF CASH FLOWS**

##### ***Review of the Group's cash flow statement for 1H2021 as compared to 1H2020***

The Group recorded net cash flows used in operating activities of approximately RM2.5 million in 1H2021 which was higher as compared to RM0.05 million in 1H2020 mainly due to the increase in inventories of the Group during 1H2021. However, it was slightly offset by the decrease in trade and other receivables and contract assets. The reasons for the increase in inventories and the decrease in trade and other receivables and contract assets can be found in the review of the Group's current assets set out above.

The Group recorded net cash flows used in investing activities of approximately RM10.6 million in 1H2021 mainly due to the purchase of new machineries and leasehold land and building.

The Group recorded net cash flows generated from financing activities of approximately RM9.5 million in 1H2021 mainly due to proceeds from short term and long term loans and borrowings offset by the repayment of loans and borrowings.

**9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.**

The Group's unaudited results for 1H2021 are in line with the Company's profit guidance announcement dated 26 August 2021.

**10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.**

(a) Since the last quarter of FY2020, there has been a worldwide container shortage problem that has affected international container cargo shipments. This has also affected the Group in the following ways:

- (i) The Group's ability to export its manufactured products on time has been affected.
- (ii) There is an increased need for warehouses to store the unshipped finished goods.
- (iii) There are difficulties in planning and maintaining an efficient production schedule.
- (iv) Our import of raw materials from overseas has been delayed.

The above have resulted in the decrease in revenue and increase in costs for the Group. We also expect the container shortage to continue for at least the next few quarters.

(b) Since FY2020, we have begun the expansion of our revenue base to include other categories of wooden products such as the millwork products. Nevertheless, the expansion is also currently affected by the worldwide container shortage as mentioned above.

(c) As disclosed in the Company's announcement dated 23 February 2021, the Group's operations in the first quarter of the current financial year have been disrupted by (i) the two-week closure of the Group's factories/warehouses in January 2021; and (ii) the movement control order imposed by the Malaysian government ("MCO") between 13 January 2021 and 4 March 2021 to curb the soaring number of COVID-19 cases in Malaysia. In addition, the Group had operated at lower capacity for the period between 25 May 2021 and 31 May 2021 and had temporary closure between 1 June 2021 and 26 August 2021 as disclosed in the Company's announcements dated 27 May 2021, 1 June 2021 and 30 August 2021. While the Group has partially resumed operations as at the date of this announcement, the Malaysian government may implement further measures to curb the spread of COVID-19 given that the COVID-19 situation in Malaysia is still evolving.
